| Of which:   |                            |            |                                    |            |                    |            |                       |          |
| Liabilities of units involved in financial activities   | 18,9                       | 0,0        | 18,9                               | 0,0        | -                  | -          | -                     | -        |
| Liabilities of units involved in other activities   | 3 324,6                    | 7,3        | 3 095,7                            | 6,8        | 228,9              | 0,5        | -                     | -        |
| Of which loss-making non-financial units  | 1 284,9                    | 2,8        | 1 238,8                            | 2,7        | 46,1               | 0,1        | -                     | -        |

### Notes:

Liabilities are defined as the index “Payable amounts and liabilities” of the balance sheet of corporations.

According to the 2<sup>nd</sup> Business Accounts Standard “Balance sheet” the liabilities are defined as a commitment which arises from transactions carried out and other events, which will be carried out and the amount can be measured.

The aggregates include only corporations reporting liabilities higher than 0,01% of GDP.

Liabilities of units involved in financial activities – includes mainly NACE (64) Financial service activities, except for Central bank, (65) Insurance activities, (66) activities auxiliary to financial services.
